Introduction

UCAM-220TT/TB is Thermographic Turret (TT) / Bullet(TB) Temperature Measurement Camera that is able to measure object's temperature at a high accuracy in real time. It is capable to discover and track people with higher body temperature among the crowded public area, it can be widely used in places such as customs, airport, school and hospital for inspection and guarantine.

Key Functions

AI Face Detection

Focus measurement areas on human face to reduce false alarms caused by other heat sources (such as teacups)

Strobe Light & Audio Alarm

Trigger alarms to notify operators immediately when a person with an elevated body temperature passed by

Bi-Spectrum Monitoring

Provide both thermal and optical image channels apart from temperature measurement

Integrated Management Software

UCAM-220TT/TB can be connected to Advantech Fever Manager (FSM) and the CMS software bundled can record the face detected information and identification for further management
